The cost and timeline are unacceptable, given schools of fish are swimming thru the barrier now. However I will ask again, for the Asian Carp team to endorse restoration of the native fish/predators of lake Michigan to a level to keep Asian Carp populations in check. Just in case this plan doesn't work, as you all know restoration of native predators does not in any way interfere with any other Asian Carp plans. You can call it a biological barrier, take the credit I don't care, we have no choice. Waiting 25 years is not an option we can afford. We can start now we have groups on both sides of the lake we only require a permit. Please ask Dave W. if it's time to go on the attack now for me, I think it is. Thank You for your time, Tom Matych
